

Establishment of Electronics Technology Center

The KYB Corporation has newly established the Electronics Technology Center as described below.

1. Reason for establishing the center

The new center will strengthen KYB's capabilities involving electronics technology. The center provides a single location for design, evaluation, and manufacturing technologies associated with electronic devices, better enabling KYB to develop electronic products used in other KYB products.

- 1) The center will centralize technologies and personnel involved with design and development activities and facilitate the accumulation of knowledge in these areas.
- 2) The center will reduce the time required to start full-scale production by providing an integrated framework extending from the development of electronic devices to the fabrication of prototypes and mass production.

2. Name

Electronics Technology Center, Engineering Division

3. Date of establishment

April 1, 2012

4. Location

At Basic Technology R&D Center, Sagami Plant
12-1 Asamizo-dai 1-chome Minami-ku, Sagamihara-shi, Kanagawa 252-0328, Japan

5. Number of staff

About 40 people

6. For further information, please contact:

Kenji Yamanouchi
Executive Officer, General Manager, Engineering Planning Department, Engineering Division
