

Editors Script

It's been over a year since I made it my goal to ride my bicycle the 10km one-way distance to work twice a week for health reasons. I sometimes don't achieve this goal. It's always a fight with my own will and weakened body, and, needless to say, there is no immediate or obvious result. However, I do feel definite changes (health = achievement), looking back on the past year. I truly feel the importance of continuing my efforts. After being appointed an editorial member for this review, I thought that the same can be said about technology/product development in companies. I hate to be self-applauding, but I feel a great change (achievement) compared to 10 years ago. To think that the technologies being developed now will be utilized in products 5 or even 10 years from now, I have more excitement than concerns.

(NAKAMURA)

It seems as though bookstores sell more books on "communicating", such as "how to write", nowadays. Indeed, I do often encounter reports that are difficult to comprehend on the first read. Now that I'm in the position to correct them, I myself am experiencing the difficulty of expression through writing. I can see the selections of books covering this "communicating" that I mentioned in the beginning. What these books have in common is "being aware of the reader". As a representative of readers, I hope to fulfill my role as an editing committee member with the aim of creating articles that are easy for the readers to read.

(YONEZAWA)

I am in charge of the Editorial Secretariat from this issue. Since joining KYB, I had been involved in product development for more than 20 years. However, I was transferred to the head office a year and a half ago, and I'm now in a position to support product development. This review is widely transmit the technologies of the KYB Group to both inside and outside the company, and we will continue aiming to make it that are enjoyable and useful for everyone who are daily involved in design and development of product. We appreciate your continued cooperation in the future.

It's a personal matter, I will be able to start the new fiscal year with a refreshed mind by the time this issue is published, as my move and my child's school acceptance examination would be over.
