
KYB TECHNICAL REVIEW

No. 60 APR. 2020

CONTENTS

Foreword			
For the 30th (No. 60) anniversary issue			
		SANADA Kazushi	1
Editorial			
Measurement and Control in Fluid Power Systems		KAGAWA Toshiharu	2
Greetings			
Greetings		ONO Masao	6
History of KYB Technology and Future Technology Strategy		HATAKEYAMA Toshihiko	7
Technology Introduction			
AI×IoT Initiatives in the Production Technology Domain at KYB		NAITO Takayoshi	9
Glossary			
Artificial Intelligence, Machine Learning, and Deep Learning		MURAYAMA Eiji	17
Technology Introduction			
Handwriting-less System Construction and Productivity Improvement for Existing Lines by IoT		TAKAHASHI Kazuhiro	19
Safety Assistance Device by Image Sensing		HASEBE Atsutoshi	24
Technology Explanation			
Condition Monitoring System		YOSHIDA Takahiro	28
		KAMEDA Yukinori	
		HARA Yasuhiko	
Explanation			
Business Strategy and the IP Landscape		SAKAI Hiroaki	36
Technology Introduction			
Development of Electronically-Controlled Suspension for Automobiles in the KYB Group		OTA Yasuhiro	45
Product Introduction			
Development of the eMIXER III		KIMOTO Keisuke	50
Full Active Suspension System for Odakyu Electric Railway Co., Ltd.		AOKI Jun	56
Development of EPS for Non-Passenger Vehicles		MIYAKE Soichiro	60
		TOMITA Haruki	
Technology Introduction			
Development of Inspection Machine Employing Image Processing		SATO Yukihiro	64
Product Introduction			
History of KYB Sports Shock Absorbers for the Japanese Market and the New Series "NEW SR MORE"		AOIKE Hiroyuki	68
		SHIBATA Kyugo	
Development of a Resin Pre-Load Adjuster		AKIMOTO Masanobu	72
Technology Introduction			
Development and Use in Mass Production of a Front Fork Cylinder Drilling Method		TSUBOI Yuta	76
Development of Small Axial Piston Pump		TSUJII Yoshikatsu	80
Introduction			
Construction of a Valve Housing Machining Line at the KYB-YS Minamijo Factory No. 2		WATANABE Shinji	85
Essay			
U.S.A Expat Experience Report		YAMAZAKI Shinji	89
Editors Script
